PUBLIC HEARINGS:

A. 7:15 PUBLIC HEARING CENTRAL STORM SEWER PROJECT

John Rodeberg and Chris Knutson of SEH, presented an overview of the Central Storm Sewer Project. Multiple storm events in the past few years have resulted in significant street flooding in the project area. The existing storm sewer system is undersized and has no storage capacity. The need to improve the drainage conditions is a major reason why this project has been identified. Streets within the project area, primarily north of 13th Street, are failing and require significant improvements. Sanitary sewer and water main utilities are aging and require replacement due to their condition.

The proposed improvement is for a 60 inch pipe from 9th Street to 11th Street. A 48 inch pipe from 11th Street to 16th Street at Louden Avenue intersection. In addition to the increased pipe size the pipe will be lowered north of 11th Street allowing for surcharge and increasing capacity. Noted was that even with the improvements as proposed, it is not possible to eliminate all street flooding within the project area. Additional ponding will be required and improvements to existing ponding is being considered. The project affects properties not owned by the City or in public right-of-way so property acquisitions will be needed. Estimated costs are $4,678,000 with dollars coming from neighborhood assessments, general tax levy, sanitary utility fund and water fund.

Mayor Wilson opened the hearing for public comment.

Questions were fielded by John Rodeberg and Chris Knutson of SEH. The public agrees the project is needed. There were ponding location concerns and assessment amount concerns.

Motion to close the hearing by Councilor Schrupp, second by Councilor Alexander. All members voted in favor.
No action was taken at this time for this project.
