June 24, 2020 | Project Update No. 53

This letter is being sent to inform you of the progress of construction activity on the above-referenced project.

The contractor has reseeded some areas on the project. We need your help to ensure the reseeded areas receive adequate water and maintenance. Your actions will be especially important if there is little rainfall and warm temperatures. Some tips for caring for your new lawn include:

- **Keep all traffic (including people and pets) out of the seeded area during the establishment period.**
- Water your new lawn 2 inches per week done in 3 or 4 applications.
- Mowing can begin when the grass lays over and mats down when wetted or the grass goes to seed. Mow your new grass as high as possible, approximately 3 inches, and cut the new grass with this setting for the remainder of the year.

If you have any questions or concerns, please contact me.

Brody Bratsch, Resident Project Representative
